# WHY GOOGLE CLASSROOM?

## Introduction:

- Blended Environment
- Increased communication
- Allows for Student Collaboration
- Place to Post/Share Information and Resources
- Students can submit work, “turn in” documents/projects
- Classroom allows for Teacher and/or Peer Feedback

# Google Assignments

Teachers use the “Create Assignment” feature of Google Classroom to assign student class/homework.

- Allows each student to have their own copy of assignment.
- Students & teacher(s) have access to the doc
  - organization of student work & due dates
  - ability to track student progress
  - pose questions/feedback in real time

# *Asking Questions on Google Classroom*

A teacher may post a single Google Question on Google Classroom for a variety of reasons.

Google Questions are great tools for;

- Introducing and eliciting responses regarding a new or controversial topic.
- Engaging all students in discussion questions throughout a lesson.
- Reviewing or recapping a concept at the end of lesson.

# The Power of Shared Documents (Docs)

Google allows for teacher-student sharing and student-student sharing of any type of document (regular doc., slides, spreadsheet).

**This has changed the way students collaborate.**

**Small groups of students or even entire classes can simultaneously work on a presentation, data table, etc.**

# Writing and Feedback

A teacher can give students formative feedback throughout the writing process using assignments on Google Classroom.

There are many benefits to this:

- Feedback is ongoing.
- Feedback is individualized.
- Feedback is private.
- Revisions are tracked and timestamped.
- Portfolio of growth as a writer is documented throughout the year(s).

# Google Calendar

A calendar embedded in Google Classroom that displays assignments for every Google class

Multiple ways to access and view.

A great way for students to keep track of upcoming assignments across classes.  
Syncs to phone.
