

COVID-19 Testing and Contact Tracing

Testing:

- Should any staff member or student require COVID-19 testing, they will work through their health care provider or the Westchester County Department of Health to identify a testing location, with the assistance of district staff if required
- In the event that large-scale testing needs to be conducted the district administration will coordinate with the District Medical Director and the Westchester County Department of Health and Northwell Health Systems

Contact Tracing:

- The district will notify the state and local health department immediately upon being informed of any positive COVID-19 diagnostic test result by an individual within the school facilities or on school grounds, including students, faculty, staff, and visitors of the district. To assist the local Department of Health the district will:
 - Keep accurate attendance records of students and staff
 - Ensure student schedules are up to date
 - Keep accurate visitor logs, including date, time and what school attended
 - Assist the local health department in tracing all contacts of the individual
